Shinmura Bridge Construction Update

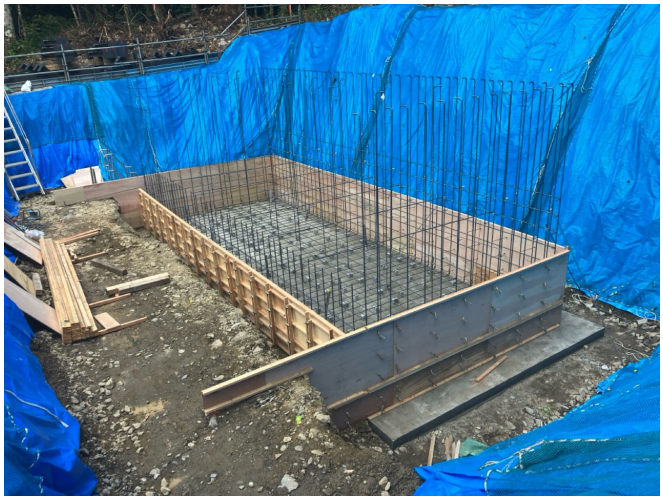

Aug 2026 Vol.2

August has brought continued high temperatures, and Kamikochi is currently in its peak season for hikers and tourists. Construction is progressing smoothly. Following tree clearing and site grading in July, we began installing concrete foundation blocks for the steel towers this month. As many hikers pass through the area, safety remains our top priority. Thank you for your understanding and cooperation.

On-Site Construction Progress

The photo on the right shows excavation work using a backhoe for the concrete block installation.
The excavation measures approximately 10 m × 10 m × 5 m, and blue sheeting has been installed to help prevent slope collapse caused by rainwater infiltration. Formwork and rebar assembly is currently underway, with seven concrete pours scheduled for September. As the structure takes shape, it may attract the attention of hikers passing through the area. If you have any questions, please feel free to ask us.

Key Schedule for September

【Planned Concrete Pouring Dates:】

- Wed, Sep 2
- Thu, Sep 3
- Thu, Sep 10
- Tue, Sep 15
- Thu, Sep 24
- Tue, Sep 29
- Wed, Sep 30

Subject to change due to weather or work progress.
